📞 +212 639 292178

## CAREER SUMMARY

Self-taught Full-Stack Developer with 7+ years of experience designing and building scalable, efficient web applications. Skilled in PHP/Laravel, SQL/non-SQL databases, and AI integration, with hands-on experience across frontend, iOS, and Android development. Passionate about continuous learning and focused on delivering high-quality, user-centered products.

Outside of coding, I enjoy traveling, hiking, and road trips.

## WORK EXPERIENCE

Senior Software Developer

Proxify 🇸🇪

Dec 2022 - August 2023

As a Backend Engineer at Proxify, I took the role to enhancing the performance and functionality of our internal dashboards while collaborating closely with our internal team. With a focus on resolving bugs and optimizing system performance, my contributions significantly improved the overall efficiency of our systems.

**Achievements:**

- Within a month of joining Proxify, I received recognition in Istanbul for my commitment to continuous improvement and pushing boundaries, being nominated in the "Never Satisfied with the Status Quo" category.

mid-Senior Software Developer

Airbit.com 🇺🇸

Feb 2020 - Jan 2024

My experience working with this company was very positive, as it had a good mission and culture. The constant flow of new and challenging ideas led me to expand my knowledge and drive to learn. Additionally, I was responsible for handling bugs and requests, which would require me to communicate with support to come up with development requirements.

**Technologies used:**

PHP (Laravel) | GraphQL | SQL (MySQL/PostgreSQL databases) | Docker / Ansible / Vagrant | AWS | GetStream/Recombee and many other services to track and to make the UX better.

Software Developer

Rwaq.org 🇲🇦

Mar 2019 - Feb 2020

I worked here as part of a team that created a SaaS educational platform used by companies to educate their employees.

**Achievements:**

- Successfully created a multi-tenant architecture and setup Unit tests for it as well.
- In this project, one of the major challenges was creating a VOD system that converts each new video uploaded to a variety of streaming qualities.

Lead Developer

Ocular VR 🇲🇦

Jan 2018 - Feb 2019

My experience at OcularVR involved developing apps for VR/AR platforms, as well as their APIs and control panels.

**Achievements:**

- Successfully delivered an Augmented Reality project to IKEA Russia and STG Maroc.
- Successfully delivered a Virtual Reality project to STG Telecom.

**Technologies used:**

PHP (Laravel/Lumen) | C# | Unity3D Engine | Unreal Engine | VueJS/Bootstrap

## SKILLS & TOOLS

Backend

PHP/Laravel

SQL DB (MySQL/PostgreSQL/Aurora/RDS)

non-SQL DB (ElasticCache/Redis)

search (ElasticSearch/Algolia)

C# / Python / GoLang

Frontend

HTML/CSS/SASS/LESS

VueJS/NuxtJS

JavaScript

Others

DevOps | Code Review | AWS | GIT | Unit Testing | CI/CD | Docker | DevOps | Asana | Jira

## LANGUAGE

Arabic (Native)  
English (Fluent)  
French (Basic)

## INTERESTS

Biking  
Hiking
